

My Lego Pieces

My Friend's Lego Pieces

Have the students put the Lego pieces, (or counters representing the Lego pieces), in each circle. Then have them record each number in the boxes below. Each time they try another possibility they record the new numbers. You may also wish to introduce or review the greater than less than signs at this point. The students can then prove their answer is correct by drawing the greater than/less than sign between the numbers. You may wish to laminate this sheet so that it can be used more than once and for a variety of tasks.
